SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

Changes in Section SF 30

The free form item 'Amendment 0001 has been deleted.

A. The following Questions and answers are incorporated into the technical provisions of the contract:

1. Specification Section 02220, Demolition. Contractor is to remove the Gun Mount located in the water at station 24+00. We would like plans of the Gun Mount.

RESPONSE: Add to Section 02220 para 3.1. Based upon similar gun mount plans, the gun mount foundations to be removed are approximately 20' across in an octagonal shape. The depth of the concrete is approximately 5'. A drawing (NTS) is attached.

2. Specification Section 02310 Beach/Dune Nourishment, Page 4, Paragraph 3.3.1 Preparation. "the contractor shall remove all.. " There are three Gun Mounts located between Stations 53+00 and 57+00, Are we to remove these foundations? Construction Debris materials generated from our contract will be cleaned up and removed from the site- Is there other construction debris from Previous contracts that we are to remove? if so how will we be paid for removing this material?

RESPONSE: No, the three gun mounts between 53+00 and 57+00 are not to be removed. We are not aware of construction debris to be removed from previous contracts.

3. The contract completion is noted as 270 calendar days. Is this for the base bid or the base bid with all the options?

RESPONSE: See Amendment 2.

4. Between Stations 61+00 and 62+00 are five exposed cables coming out of the dune and extending into the beach area, What are these cables and what provisions should be taken to protect these cables?

RESPONSE: No protection is necessary, these lines are not active. These cables were part of the Coastal Defense network that lined the Bay during WWII.

5. The soundings, elevations and benchmarks were taken in June and July 2000- Can we assume that the elevations shown on the plan will be used for the, basis of our bid? We would like to be reimbursed for additional excavation or bedding stone required if the elevations are different from what is shown on the plan.

RESPONSE: The elevations shown on the drawings can be used as the basis of the contractor's bid. If the contractor wants, he always has the option to take soundings of the existing bottom in the vicinity of the breakwaters to determine quantities at the time of the bid.

6. The 24" Stormdrain Pipe, at Station 18+80 does not appear to be a working pipeline. The end of the pipe is covered with sand, and there is no evidence of water exiting the pipe. Who is responsible for cleaning the existing pipelines?

RESPONSE: This stormdrain outfall is active. Cleaning the sand out of the remaining existing stormdrain pipes between the new manhole and the existing manhole to remain will be the responsibility of the Government.

- B. The following is added to solicitation section 00100 and are to be included in the technical proposal:

Contractor Performance and Banking Information

1. Prior to awarding a contract, the Government must conduct a Pre-Award Survey of the firm selected for award. In order for us to minimize delays in conducting the survey and awarding the contract, you are requested to provide the following information with your offer:

- a. Bank:
Branch/Location _____
Point of Contact _____
Telephone/Fax _____

Please contact the bank in advance so that they will release the information regarding the average balance in your operating accounts, lines of credit, and credit history.

- b. Current or Completed Projects of similar scope and size (Provide at least 3)
Project Title/Contract Number
Customer
Point of Contact
Telephone/Fax
Dollar Value
Percent Complete
Scheduled/Actual Completion Date

- c. Listing of current projects.

Do not provide voluminous listings of your firms contracting history.
